

AGI ROOT ONE COIN

POST-D2 POLYGONSCAN REMINDER CHECKLIST

Current Status: D2 Complete. Root is anchored on Polygon.

1. PolygonScan Name Tag & Label (When Website Is Live)

- Return to PolygonScan contract page.
- Submit Name Tag: 'AGI Root One Coin (Constitutional Root)'.
- Choose neutral Label (NFT / Protocol / Other as appropriate).
- Add official website link (e.g., <https://openagi.llc>).

2. Minimum Website Page Requirements

- Display canonical contract address: 0x135B5dB8424b8F14ceFB9d8Ad629E16909B4F145
- Display D1 SHA-256: 4255FC9973C99ADBF909F730A0070A58AC013DC4929BECC635852836E4797451
- State clearly: Non-economic constitutional artifact (Supply = 1).
- Link to D1 PDF (AGI_Root_One_Coin_Laws_v1.pdf).
- Link to PolygonScan contract page.
- Link to canonical GitHub repository: github.com/Architect-AGI/AGI_Root_One_Coin

3. Important Notes

- This step is cosmetic (UX polish), not security-critical.
 - Does not affect ownership, immutability, or D3/D4.
 - Can be completed anytime after website is live.
 - PolygonScan is a viewer only — the contract lives on Polygon regardless of PolygonScan uptime.
-

4. Next Phase After Website

Begin D3 Custody Hardening (Five-Safe Model setup on Gnosis Safe).

Then proceed to D4 Mirroring: IPFS / Arweave / GitHub / public page.
